

Freezers for the frozen food
and ice-cream industries
2017

LIEBHERR
Quality, Design and Innovation

Highly efficient and economical: Liebherr freezers

Continuous operation in professional applications puts special demands on freezers for the frozen food and ice-cream industry. That is why liebherr takes great care in the development of these appliances to meet your customer requirements with high quality and innovative ideas. High-insulating materials, in conjunction with highly efficient compressors, efficient refrigerants, and well-balanced refrigeration components as well as precision electronic

control systems, ensure outstanding refrigeration capacity – even in extreme conditions. In addition, the appliances are easy to clean and very economical in consumption. Company and product brands can be used to stimulate impulse buying. liebherr offers a wide range of models for almost any application, always featuring premium quality and top design. You can rely on liebherr professional appliances – 24 hours a day, 365 days a year.

Climate class 3: Ambient temperatures from +10°C to +25°C
Climate class 4: Ambient temperatures from +10°C to +30°C
Climate class 5: Ambient temperatures from +10°C to +40°C
Climate class 7: Ambient temperatures from +10°C to +35°C

Good reasons to choose Liebherr

Highest performance

Liebherr freezers for the frozen food and ice-cream industries provide full refrigerating capacity even in extreme climate conditions. The use of ultra-modern components, efficient and environmentally friendly refrigerants as well as precision controls ensure that product quality and freshness is preserved – and the appliances are always efficient.

Efficiency

Liebherr freezers operate extremely economically: highly efficient compressors, a precision electronic control system as well as highly effective insulation ensure low power consumption and low operating costs. The high quality of the virtually maintenance-free and service-friendly appliances guarantees long life and reliable operation.

Robust quality

Liebherr appliances are specially constructed for intensive professional use and feature a very sturdy design – with highest quality materials and perfect workmanship right down to the smallest detail. The quality of the appliances is ensured by elaborate tests. All electronic and refrigeration components are well-balanced to ensure maximum functionality and efficiency – including an attractive design.

Easy cleaning

Hygiene plays an especially important role in the commercial sector. That is why liebherr upright freezers are equipped with moulded inner liners with large radii that are easy to clean. Height-adjustable wire shelves enable individual adaptation to different packaging types or products.

Easy servicing

Liebherr freezers are designed for easy servicing; the generously radiused corners on the moulded inner liners as well as easily removable shelves enable perfect hygiene and save a lot of time. In addition, Liebherr appliances are virtually maintenance-free and very easy to use thanks to their sophisticated concept. All components requiring regular servicing are designed for easy access.

Product presentation

Attractive product presentation is the best sales support at the point of sale. In liebherr freezers products are always stored optimally, are within easy reach – and stimulate buying. Large, smooth-running sliding glass lids as well as effective interior lighting enable perfect product display. Excellent product visibility is ensured by the high load line height. Sturdy baskets and adjustable shelves allow perfect adaptation of the storage space to the products stored.

Increase awareness of your brand

Customised vinyl's

Depending on the quantity and motif, the desired brand is applied on a suitable vinyl sticker, usually PC film, in a screen printing or digital printing process. Vinyl stickers can be applied by liebherr in the factory.

Display/ side wall/door colours

Customised colour design enables eye-catching presentation of your brand and extremely attractive product display. Different materials and effects can be used to individually design the side walls, the door frames, the handle, the base compartment, the display frame and the inner liner according to customer specifications.

liebherr offers many individual and impressive branding options for freezers. You can choose between various methods and different models from the ice cream and impulse chest area. Upon request we can develop customised appliance concepts to meet your specific brand requirements.

LED logo

An individual motif can be engraved and illuminated with LEDs between the two panes of glass door. The effect is impressive – the motif is showed off brilliantly.

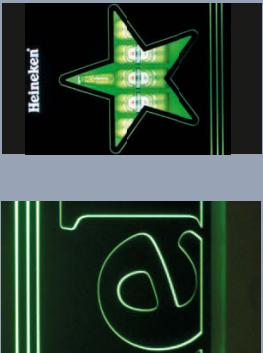

Customised colour design

Customised colour design enables eye-catching presentation of your brand and extremely attractive product display. Different materials and effects can be used to individually design the side walls, the door frames, the handle, the base compartment, the display frame and the inner liner according to customer specifications.

3D brand

3D brands give an appliance exceptional appeal and open up completely new possibilities for using images creatively. A special method enables the production of high-quality decals using 3D printing (lenticular method). In addition, we work with different printing levels and layers on the glazing which produce a 3D effect when combined with the right lighting from behind. This way every appliance stands out individually and stimulates impulse buying.

3D effect

Lenticular method

The advantages at a glance

Combining plastic aluminium frame for dimensional stability
with rounded corners for hygienic purpose and user protection in
an attractive modern design.

The toughened, single-pane safety glass is shatter-proof,
resilient and stabilises the upper area of the chest.
Good product visibility is ensured by reduced heat radiation.
The lid can be removed for easy handling and cleaning.

The hot-gas frame heater prevents
condensation on the glass lids,
provides a clear view of the products
inside the chest and supports optimum
product presentation.

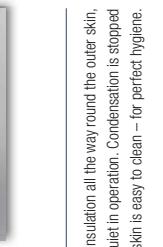

Sturdy suspended baskets provide a clear view of the goods presented.

Profiled seals allow easy lid opening and closing.

High-performance insulation ensures
that temperatures remain even and
reduces energy consumption.

The cooling condenser is embedded in the foam insulation all the way round the outer skin,
which reduces vibration and makes the appliance quiet in operation. Condensation is stopped
from forming on the housing; the outer skin is easy to clean – for perfect hygiene.

Sturdy swivel castors make
it easier to move the appliance
and allow convenient cleaning
underneath the appliance.

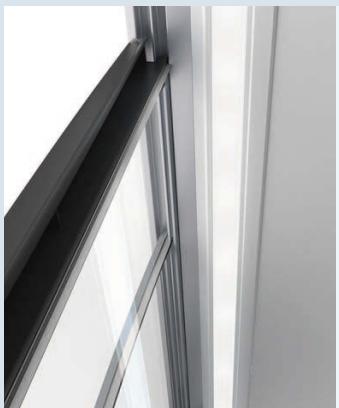

Analogic internal temperature display at load-line level
with adjustable range between -10°C and -24°C to suit individual needs.

Quality right down to the smallest detail

Liebherr chest freezers are specially designed to meet extreme requirements and withstand high stress in professional applications. Sturdy materials, high-quality refrigeration components and quality workmanship guarantee long life. High-impact product

presentation in the chest freezers is ensured by sturdy baskets and sliding glass lids which provide a clear view. In the wide range of sales chest freezers, you will find the right appliance with suitable features for every requirement.

Smooth-running sliding glass lid.

The curved sliding glass lids on the EFE .00 models are made of toughened, single-pane safety glass. The lid halves are easy to move thanks to profiled seals and the plastic frame heated by hot gas from the compressor.

Insulated sliding lid.

The solid lids on the EFE .00 models are extremely robust thanks to the composite aluminium and rigid PVC cover. The top is protected with a scratch-resistant aluminium worktop. A lid lock is available as an accessory.

Maximised total display area.

The slim yet highly durable plastic and aluminium frame provides the greatest possible surface area for displaying merchandise. This means that customers have the best possible view of the freezer's contents and product presentation is optimised.

Stability and design.

Combining plastic parts at the side with connecting aluminium profiles, the cover frame of the EFI and EFE models are very attractive in appearance.

High-impact product presentation.

EFI / EFE chest freezers are fitted with a LED interior light that can be switched on separately. The glare-free light is horizontally integrated into the front of the inner liner. Sturdy baskets are available in different sizes for impulse and bulk ice-cream. They can be flexibly arranged to ensure optimum use of the interior. Practical partitions for this purpose are available as an accessory.

Quieter thanks to outer skin condenser.

Thanks to the foamed in outer skin condenser, the ice-cream chest freezers are virtually maintenance-free – and the housing is easy to clean. In addition, condensation water does not form on the outside.

Sturdy swivel castors.

Swivel castors make transport easier especially when the chest appliances have to be moved frequently. All EFE / EFI models are equipped with high-quality non-marking polyurethane 50-mm swivel castors.

The advantages at a glance

The **cooling condenser** is embedded in the foam insulation all the way round the outer skin, which reduces vibration and makes the appliance quiet in operation. Condensation is stopped from forming on the housing; the outer skin is easy to clean – for perfect hygiene.

The **handle** is simple and tough.

Highly effective insulation prevents energy loss and supports the excellent energy efficiency of the chest freezers. The insulation of the freezers consists of 70-mm-thick, HFC-free polyurethane foam.

The powder-coated sheet steel **housing** features a gap-free design which makes it very sturdy, scratch- and impact-resistant.

The **perfect foaming** of the housing ensures that the chest freezers have the necessary cold reserves even at high ambient temperatures.

The **steel inner liner** with rounded corners is easy to clean and meets hygiene requirements.

The **lock** prevents unauthorised access.

The **main body** of the **chest** features a very sturdy and rugged design, which ensures that the chest can withstand intensive loads and are torsion-free.

Stop Frost

The **Stopfrost system** reduces frosting on the interior and stored products, so the time-consuming process of defrosting is necessary far less often. The chest can be re-opened effortlessly even after the lid is opened and closed because vacuum does not build up.

Adjustable temperature range between -10 °C and -24 °C to suit individual needs.

The **analogue temperature display** tells the user the exact internal temperature.

Smooth-running, **double swivel castors** with 50 mm wheel diameter are used for excellent manoeuvrability. The stable castors are individually screw-fitted and can be changed without difficulty.

The advantages at a glance

The **display illuminated by energy-efficient LEDs** attracts attention to the appliance and its contents. The display panel can be customised and switched in parallel with the interior light. In addition, specific branding attracts attention to a brand or products. A wide variety of colour options is available for the housing and door frame.

The **NoFrost module** is installed behind the display and enables maximum usage of the interior.

The **high-performance forced-air cooling system** rapidly cools down products and maintains a uniform cooling temperature throughout the interior.

The **tough slimline door handle** is ergonomic, easy to grasp and easy to clean.

The **heavy-duty wire shelves** are plastic-coated and have a loading capacity of up to 50 kg. Easy removal at a door opening angle of 90°.

The **moulded inner liner** made of food-safe polystyrol is odourless, very sturdy and durable. It enables perfect hygiene thanks to the generously radiused, easy-to-clean corners.

The **highly efficient hot gas defrost system** reduces defrost time to approx. 10 minutes, which distinctly reduces the temperature rise in the appliance. The food quality is preserved for a longer period of time because the products do not have to be removed during the defrost phase and they are not exposed to unnecessary temperature fluctuations.

The **vertical LED lighting mounted on both sides** ensures bright illumination of the interior and supports sales promotion with optimum product presentation.

The glass doors with a tough **aluminium frame** have a 90° dwell position allowing for easy loading and removal of larger product quantities. At less than 60° the doors close automatically to prevent loss of cold air.

The **triple-pane glass door** prevents external condensation.

The air-deflection baffle, mounted in the lower part of the inner liner, deflects the flow of cold air away from the glass door and thus **prevents condensation forming on the outside of the door**. The improved glass door insulation also helps to reduce condensation formation on the door and thereby facilitates optimum product presentation (FDv 4643/Fv 3643).

A special **anti-fog film** significantly delays misting on the inside of the inner liner, thus consistently ensure optimum visibility for the products stored (FDv 4643/Fv 3643).

The **digital temperature display** tells the user the exact internal temperature that has been set. The temperature range can be set from -10°C to +25°C using the precision electronic controller.

The natural and **environmentally friendly refrigerant R 290** is CFC free and, in conjunction with highly efficient compressors, very energy-efficient.

Fdv 4643

The **robust lock** prevents unauthorised access.
