How to Use

To keep your beverage warm or cool longer, pour hot (or cold) water into the body, and let it sit for one or two minutes to allow the inside of the body to heat (or cool).

Slide down the safety lock, push the button to open the lid, and then drink.

After drinking the beverage, keep the main body in an upright position and then close the lid. Slide up the safety lock.

The product rattles when shaken.

This is caused by a metal sheet moving inside the product and it does not affect the performance of the product. The metal sheet is used for boosting the performance of heat retention.
