LAINOX®

Zoom, SHIFT THE FOCUS TO FOOD SAFETY

With the crucial link between cooking and holding, thanks to its high cooling power and respective ventilation, **Zoom** quickly chills products, blocking the spread of bacteria, preventing moisture loss, and **thus protecting the food's original sensory properties.**

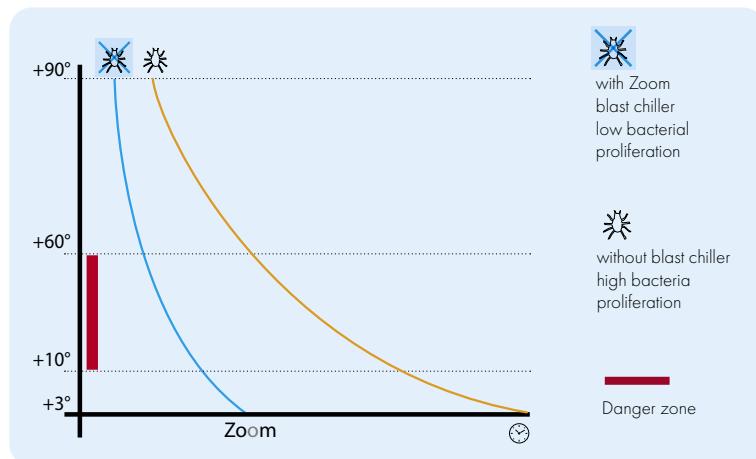

Zoom is fundamental in new kitchen organisation systems, where **preparation, cooking, blast chilling, holding and reheating** are all consecutive stages of a single working system, which separates meal production times from service times (distribution and consumption).

BLAST CHILLING

+90°C UP TO +3°C

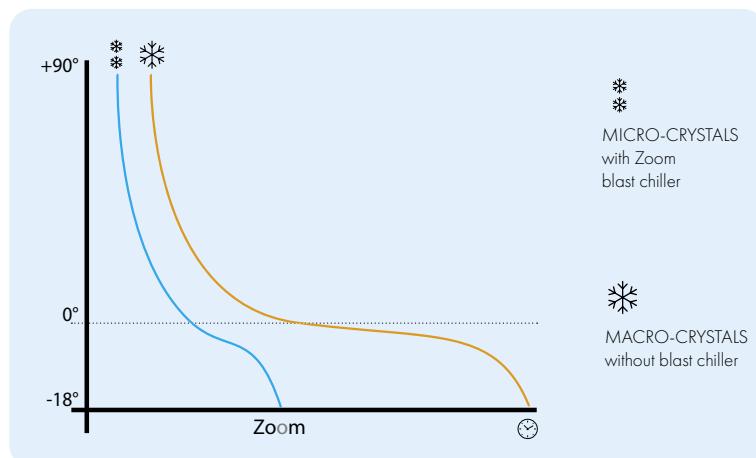

Blast chilling at the core of the food creates a thermal shock which prevents the proliferation of bacteria that causes food to age. As a result, food keeps better longer.

SHOCK FREEZING

+90°C UP TO -18°C

A standard freezer freezes food slowly which forms macro crystals in liquids that damage the tissue structure. Subsequently, the consistency of the product, and therefore, the quality of the product deteriorates during thawing. Zoom, however, rapidly lowers the core temperature of any food to -18°C exploiting a cell temperature of -40°C, with the formation of micro crystals that do not damage the structure of the product. This means that a top quality product is obtained even after thawing.

ERGONOMIC CONTROLS

COMFORTABLE, EASY, PRACTICAL

The cabinet models include a practical control interface positioned on the door, which in the case of the 051 model, makes it particularly ergonomic. The functions have all been designed to be activated using the digital touch keys, and the pre-set data values are shown on a 2.8 inch graphic colour display.

From the menu, it is possible to select either one of the 7 pre-set recipes or 20 personalised recipes, which can be saved according to need.

MORE POWERFUL, MORE EFFICIENT AND EASIER TO CLEAN

- Up to 80% more blast chilling capacity*

- Minimum consumption thanks to the new cell insulation system
